

BERTRAND DUBAUT

SOFTWARE ENGINEER - RUBY DEVELOPER

bdubaut@gmail.com +61 481 755 342 [LinkedIn](#) [Github](#) [Twitter](#)

I'm a French software engineer living in Brisbane, Australia. I am 28, speak fluent English, and have a Master's degree in Computer Science from one of the top French Computer Engineering schools.

I am a ruby developer (Ruby on Rails, Grape API...) with strong software and cloud architecture skills. I am an Elixir enthusiast (functional programming), and keen to further my skills with front-end technologies like React or Relay.

My technology monitoring skills, up to date with the current state of our industry, will be appreciated. On a personal note, I have played baseball my whole life, including one year of college Baseball in California. I now play competitive Baseball and coach a youth team here in Brisbane in my spare time.

Contact details will be provided if requested.

Jasmyn Mason, HR manager

Jasmyn is the HR manager for EverydayHero.

Ryan Booker, Ruby/iOS developer

Ryan and I worked together for Oomph and EverydayHero.

Valerie Abbot, QA Manager

Valerie hired me to work for Oomph when I first arrived in Australia.

INTERESTS

Baseball

Current

The sport I have played all my life

Mixology

Current

Making cocktails is an advanced hobby of mine. It's just like cooking or baking, only I like to create sophisticated beverages.

History

Current

Learning about the History of all cultures is something that interests me a whole lot.

Music

Current

I played the piano at the Conservatorium when I was young. Now I am learning Ukulele because it's easier to carry around.
